Achievements

Full-Stack Developer — General Brass Industries, Jamnagar ↗ Live 2026
(Brass Components Manufacturer · generalbrassind.com)

- Brass manufacturers often rely on referrals and offline networks to find customers. Developed and deployed a live business website that showcases products, strengthens credibility, and helps connect the company with potential buyers beyond local markets.
- Smart India Hackathon Grand Finalist.
- Intellify 4.0 Finalist.
- Project Morpheus 2026 Finalist.

Projects

Student Engagement Analytics ↗ GitHub 2025 – 2026
PyTorch · OpenCV · Computer Vision · DAiSEE Dataset

- A teacher can't watch every student at once. This platform turns ordinary webcams into engagement sensors, identifying attention patterns in real time and helping educators intervene before students tune out.

Court Order Information Extraction ↗ GitHub 2025 – 2026
Python · spaCy · NLP · Named Entity Recognition

- Legal professionals spend hours searching through lengthy judgments for a handful of key facts. This NLP system surfaces critical case information instantly, transforming document review from hours to seconds.

CompareKart 2025 – 2026
React.js · Scikit-Learn · Random Forest · Pandas

- Online shoppers often buy products without knowing whether prices will rise or fall tomorrow. CompareKart analyzes historical pricing patterns and predicts future trends to answer a simple question: buy now or wait?

Schedulify — Automatic Timetable Generator ↗ GitHub 2025 – 2026
Python · Scheduling Algorithms · Database Management

- Academic coordinators often spend countless hours resolving timetable clashes. Developed an automated scheduling system that generates conflict-free timetables in minutes, reducing manual effort and improving resource utilization.

Payroll Management System ↗ GitHub 2025 – 2026
C# (.NET) · SQL · DBMS

- Payroll errors don't just waste time — they affect employee trust. This system automates salary processing, tax calculations, and report generation, allowing businesses to manage payroll with speed and accuracy.

Research & Intellectual Property

Not published yet.

- Classroom Engagement Analytics Using Real-Time Vision Inference and Learning-Aware Dashboarding.
- Multi-Strategy Text Preprocessing for Improved Abstractive Summarization of Legal Documents.

Certificates

Cisco Networking Academy

- CCNA: Introduction to Networks Feb 2025
- CCNA: Switching, Routing, and Wireless Essentials Mar 2025
- Introduction to Cybersecurity Nov 2025
- Linux Essentials Apr 2025
- Cisco Packet Tracer — Getting Started & Exploring Networking Jun 2025

Technical Skills

Languages	Python, Java, C, JavaScript, SQL, HTML5, CSS3
Data & Analytics	Excel, Power BI, Pandas, NumPy, Data Visualization, Dashboard Development, KPI Analysis, Business Reporting
Business Analysis	Requirements Gathering, Process Analysis, Market Research, Stakeholder Communication, Process Improvement
AI / ML	PyTorch, OpenCV, scikit-learn, spaCy, Computer Vision, NLP, Machine Learning, Deep Learning
Web Development	React.js, FastAPI, Flask, Node.js, REST APIs
Databases & Tools	MySQL, SQLite, Git, GitHub, VS Code, Google Colab

Soft Skills

Critical Thinking · Problem-Solving · Communication · Teamwork · Adaptability · Leadership · Time Management

Education

B.Tech in Computer Science Engineering Marwadi University, Rajkot, Gujarat
CGPA: 6.76 · SGPA: 7.83
